

**HARVARD**  
MEDICAL SCHOOL

## **Curriculum Fellows Program**

### **HMS Program in Graduate Education**

Harvard Medical School (HMS) seeks talented early-career scientists interested in a career in education to apply for a three-year fellowship within the HMS Curriculum Fellows Program (<https://curriculumfellows.hms.harvard.edu>). Curriculum Fellows work closely with committed members of the HMS faculty and administration to develop, deploy, and evaluate evidence-based graduate biomedical education and training. Fellows have gone on to careers as directors of curriculum in a variety of academic programs, leaders in centers for teaching and learning, discipline-based educational researchers, faculty at teaching-focused undergraduate institutions, and administrators of higher education.

The majority of each fellow's time is spent serving the curricular and programmatic goals of the specific academic department or graduate training program that hires them (see below for the current openings). In addition, fellows create curricular and para-curricular programming for biomedical graduate training across HMS, gain experience in the application of evidence-based teaching practices, and are provided with highly individualized professional development opportunities. Fellows are expected to contribute to the HMS community by attending and presenting in workshops, an education journal club, and pedagogy-focused seminars. Collaborations to improve training across the HMS Program in Graduate Education are encouraged and opportunities may exist to teach undergraduate courses and/or conduct discipline-based educational research (DBER) — in both cases either in- or outside the scope of the fellows' primary service.

Suitable candidates will have a PhD in a scientific field that adequately prepares them to develop graduate-level curricula specific to the hiring program or department. Demonstrated interest and experience in scientific teaching is required, preferably at the graduate or undergraduate level. The fellowship is intended for early-career scientist-educators. Therefore, applications from candidates with more than 5 years of postdoctoral research or teaching experience are discouraged. Fellows are appointed as Research Associates, with possible promotion to the rank of Lecturer contingent on experience and performance.

### **2019 CURRICULUM FELLOW POSITIONS**

**Details about the specific responsibilities and subject expertise required for each of the currently available fellow positions can be found at the CFP website:**

<https://curriculumfellows.hms.harvard.edu/job-opportunities>

**Curriculum Fellow in Genetics and Genomics**

**Curriculum Fellow for the Program in Neuroscience**

**Curriculum Fellow in Online Learning and Immunology**

**Curriculum Fellow in Cell Biology**

**Curriculum Fellow in Developmental and Regenerative Biology**

**To Apply:**

Qualified candidates are welcome to apply for more than one of these positions with a single application. Candidates will be interviewed by phone or Skype before selections are made for on-campus interviews.

Applicants should email a single PDF document containing:

(1) a letter of application that clearly identifies the specific curriculum fellow position or positions to which you are applying, including your interest in and qualifications for the position

(2) a curriculum vitae

(3) a statement of teaching philosophy

Address emails to [cfp@hms.harvard.edu](mailto:cfp@hms.harvard.edu), attention Dr. Bradley Coleman, Co-Director of the HMS Curriculum Fellows Program. Include the names and contact information of three references, who will be contacted during the review process. **The review of applications will begin Tuesday, February 19<sup>th</sup>, 2019.** Curriculum Fellows are located in the Longwood Medical Area in Boston, MA.

*We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.*
